

FIT for the Future

Feed-In Tariffs (FITs) and their application in the United States

Strategy workshop

Washington, DC, March 2, 2008

This Workshop is co-hosted by the **World Future Council**, the **Heinrich Böll Foundation*** and the **Worldwatch Institute** for the purpose of discussing the need and potential for Feed-in Tariffs (FITs) in the United States, possible strategies for promoting FITs, and barriers to FITs that must be overcome on the state and federal levels. The workshop will draw on European experiences with Feed-In Tariffs and will explore the possibilities and potential for FITs and for FIT-RPS hybrid systems in North America, including job creation, economic growth and energy and climate security.

* This event has been made possible by funding from the European Commission. The European Commission is not responsible for contents of the event.

15.00 Panel III: Feed-In Tariffs in the US – practical solutions and different approaches

Central questions:

▶ What are the technical problems and constitutional barriers to FITs on the federal level, and how can they be resolved? How can federal legislation interact positively with state legislation? How can we overcome the general opposition to/lack of awareness about FITs in the United States? Do Feed-In Tariffs function well in a deregulated environment? Are Hybrid approaches a possible solution? How could such approaches be designed? What lessons can be drawn from experiences with the EU directive on the promotion of electricity produced from renewable energy sources? How could FITs be designed to encourage investment in dispatchable renewable power and storage to meet base load power requirement?

Speakers: Paul Gipe
James Bradbury
(Rep. Jay Inslee's office, D-Wash)
Aaron Peterson (State Legislator Minnesota, D
and National Caucus of Environmental
Legislators)
